

Options for CEPHEUS Picosecond Laser

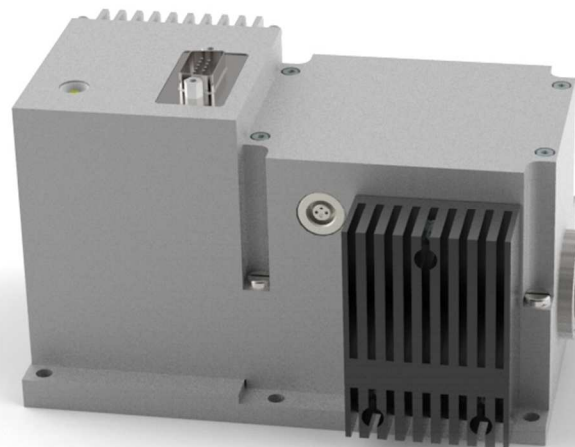

Variable Attenuator

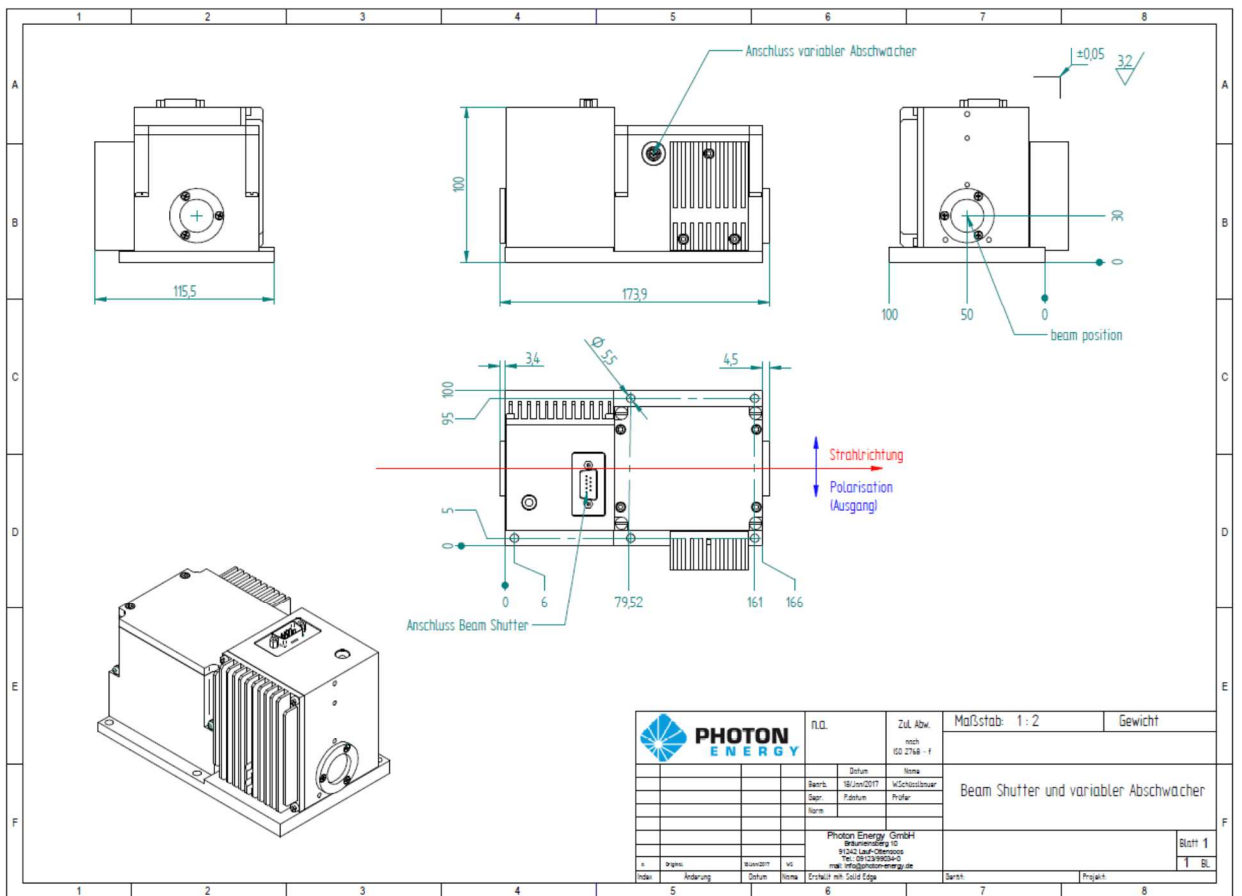

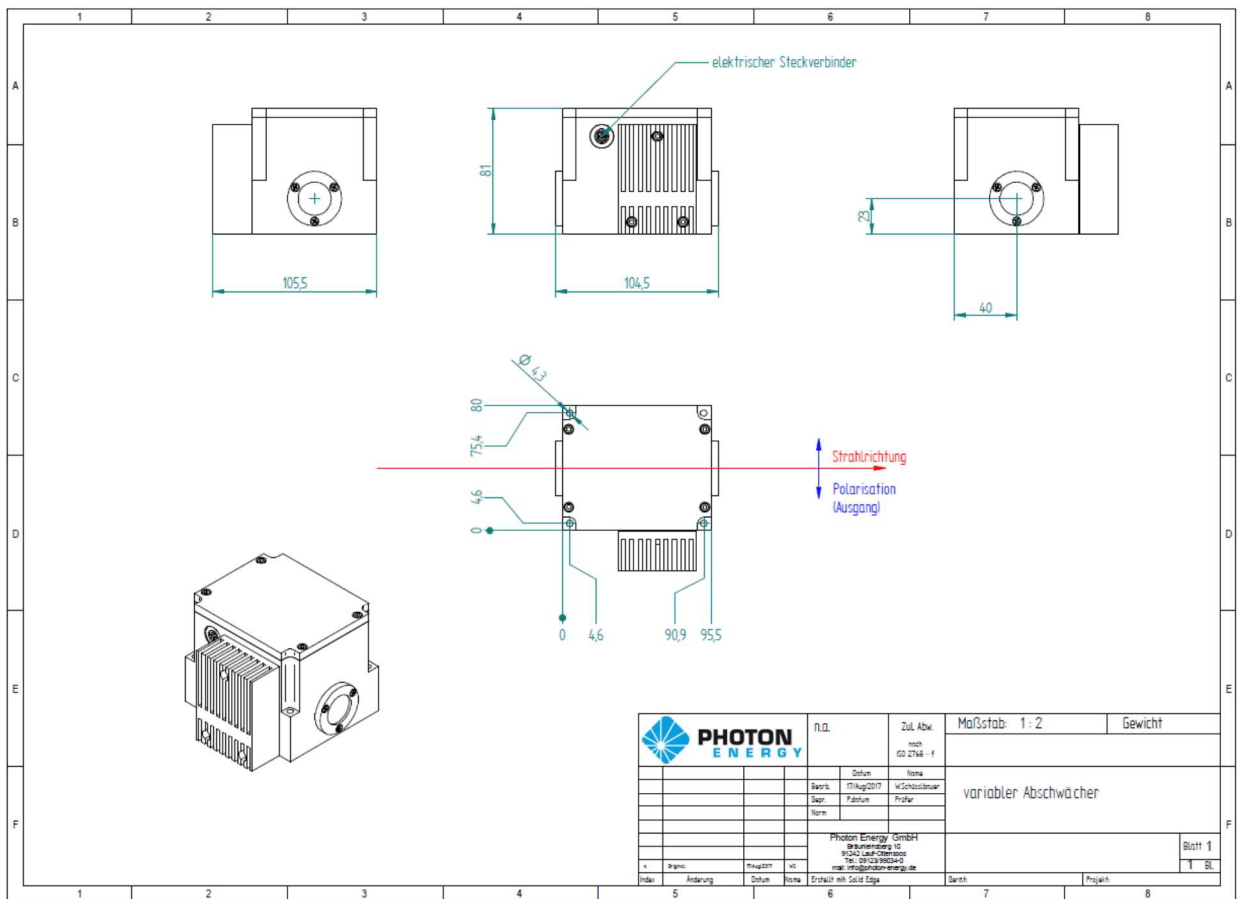

- variable attenuation
- 8-bit resolution
- max. transmission 95%
- linear output polarization
- can be calibrated
- air-cooled beam dump
- sealed housing
- stand-alone unit
- controllable via CEPHEUS software

Variable Attenuator with Safety Shutter

- compatible with DIN 60825 and machinery directive 2006/42/EC
- monitored shutter end positions
- dual channel system for secure and redundant control
- variable attenuation
- 8-bit resolution
- max. transmission 95%
- linear output polarization
- can be calibrated
- air-cooled beam dump
- sealed housing
- stand-alone unit
- controllable via CEPHEUS software
